DIVISION OF WATER RIGHTS. JERRY D. OLDS STATE ENGINEER,

Claimant

East Bench Irrigation Company ATTE: Randy Hatch PO BOX 489 Panguitch, UT 84759

Respondent

**AMENDED** MEASURING DEVICE & **HEADGATE NOTICE** 

865 WR. NO. 61-685, 61-2845, 61-2846 **SEAA 1267** 

TO: East Bench Irrigation Company:

The Division of Water Rights visited the Parshall flume of the East Bench Irrigation Co. located at the split between the East Bench Irrigation Co. and the Long Canal Co. after the SEAA 1267 had been issued. It was found that the flume operates in a high-submergence condition under high demand of water. Operating a Parshall flume in a high-submergence condition does not allow for accurate measurement of the water being used.

With this additional information provided to the Division it has been decided that an amended SEAA 1267 is necessary to allow for accurate flow measurement at the split. Therefore the current SEAA 1267 is amended to include the requirement that a functional measuring device be operating for all flow conditions at the described split on the East Bench Irrigation Co. side prior to April 1, 2009. The original requirement that a functional stilling well be installed is still in effect. You must contact Commissioner Ray Owens at (435) 527-4757 to coordinate the required improvements to his specification and notify him prior to and during any work. This will insure that the needed improvements on the East Bench Canal Co. at the split are completed to his and the Division's satisfaction.

If you have questions concerning this notice, please contact me by phone at (801) 538-7374 or by e-mail at VanceTwitchell@utah.gov or Regional Engineer Kirk Forbush by phone at (435) 896-4429 or by e-mail at KirkForbush@utah.gov. JIVISIUM OF WATER HIGH
